Soundbooth CS3 will appeal to users who want to use audio in their everyday tasks: recording and editing, removing unwanted noise, customizing sound effects, adding aural emphasis to a scene, or creating royalty-free music to match the mood of a production. Soundbooth's tight integration with Flash and Premiere Pro lets users create flawless voiceovers, remove pops and scratches from recordings, and create customized music for any video or Flash production. Using step-by-step instructions with projects that build on the knowledge learned in each lesson, readers will learn techniques for recording new dialog tracks and sound effects while learning how to modify existing audio files with tools that cut, copy, paste, fade, stretch, and add effects. Readers will also learn how to take advantage of AutoComposer, a feature that speeds the process of creating customized music to accompany their projects. 199 pp. Englisch.
