

Qualitative Organic Microanalysis

Filesize: 4.04 MB

Reviews

A whole new e book with a brand new standpoint. I have read through and i also am certain that i am going to planning to read again yet again later on. I found out this book from my i and dad advised this pdf to learn.

Book Condition: New. Publisher/Verlag: Springer, Wien | Cognition and Recognition of Carbon Compounds | The most important task of the analytical chemist, aside from the acquisition of experimental data, is the coordination and interpretation of such data in terms of the qualitative and quantitative composition of the test substance. As in the old tale of the blind men and the elephant, a single observation or test, not considered in conjunction with others, may lead to entirely erroneous conclusions. On the other hand, mere increase in the number of such tests, without regard to their need or to their relationship to each other, also may not suffice for drawing the correct inferences from the experimental evidence. The deductive reasoning which is usually associated with the analytical chemist finds its greatest opportunity for application in the problems of cognition and recognition of carbon compounds. Since a rigid scheme of procedure tends to produce a corresponding rigidity of thought, the intent of the present book is to outline approaches which will minimize the chances of misinterpretation without restricting the analytical chemist in his choice of tests. The selection of subsequent tests or reactions should be governed by the results of the preceding ones rather than by an arbitrary list. The relationships of the various approaches (and the information derived from each) to the composition and constitution of the test substance are brought out in the discussion with the hope that they may serve as guide lines for such selection. | I Fundamental Techniques and Preparation of Sample.- I. Fundamental Apparatus and Operations.- Capillaries.- Microscope Slides.- Microcones.- Spot Plates.- Reflex Tubes.- Microbeakers.- Determination of Weight.- The Microscope.- Reagents.- II. Preparation of the Sample.- Tests for Purity.- Separation of Minor Components and Impurities.- Mechanical Separation.- Distillation.- Fractional Distillation.- Recrystallization.- Zone Melting.-...
