## THE KANSAS UNIVERSITY SCIENCE BULLETIN VOLUME 6, NO. 1

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 84 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: . . . V. We must now return to the consideration of the equations for  $l_i$  among the elements of  $M$ , which define a system of collineations within  $G_s$  having the first group property; and we shall apply the results of Theorem 9 to these equations. Let the three sets of cogredient variables be respectively the elements of the three rows of the matrix  $M$  let  $B$ , etc. , ) be a complete family of automorphic forms in the elements of the rows of  $M$  and let  $p_i$  be transformed by  $U$ . Since the matrix of  $U$  is the conjugate of the matrix of  $M$ , the coefficients of each of the transformed forms , , will reproduce in the elements of the rows of  $M$  the original forms in the rows of  $M$ . Equating corresponding coefficients of the original and transformed forms we have a set of equations  $f_c(t, b \text{ etc. } , )$  which satisfies both conditions of Art. 185. We may let our three sets of cogredient variables be respectively the elements of the three columns of  $M$ . ; if the complete family of automorphic forms in the elements of these columns be transformed by  $V$ , the coefficients of each of the transformed forms will reproduce in the elements of the columns of  $M$ , the original forms. Equating as before corresponding coefficients of the original and the transformed forms we have a set of equations  $f_c(a, u, \text{etc. } , )$  which satisfies both conditions of...
