

Graphical statics. Two treatises on the graphical calculus and reciprocal figures in graphical statics.

Filesize: 1.28 MB

Reviews

A fresh e book with an all new viewpoint. It is really simplistic but unexpected situations in the 50 % from the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Dawn Hane)

GRAPHICAL STATICS. TWO TREATISES ON THE GRAPHICAL CALCULUS AND RECIPROCAL FIGURES IN GRAPHICAL STATICS.

DOWNLOAD

University of Michigan Library. Hardcover. Book Condition: New. This item is printed on demand. Hardcover. 200 pages. Dimensions: 9.0in. x 6.0in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 edition. Excerpt: . . . crooked line AabcdeC, we draw IV parallel to ca s cc dV fljr gcr r till each intersects the side Aa, eB Cd and now the whole polygon Aabcde C012345 is reduced to the equivalent quadrilateral ABCD. 103. This is the easiest and most convenient way of finding the areas of figures, the perimeters of which take the most different forms. With a little practice we learn to perform the reduction quite mechanically, and without paying any attention to the actual form of the proposed circuit. This construction moreover permits us to take account of signs, so that in dealing with areas of different signs, the result gives the actual sign belonging to their sum without further a trouble. Take, for example, the self-cutting circuit (Fig. 90) ABC01234, which represents the cross section of an embankment and excavation in earthwork. Fig. 90. Draw 11 parallel to 20, 22 31, 33 42, 42 A3, until they meet the side CO, then the given polygon is reduced to the equivalent quadrilateral ABCD, which therefore represents the difference between the areas ABCI4 of the embankment and 70123 of the excavation, which have necessarily different signs. The circuit ABCD has the same sign as the circuit ABCI, or as the circuit 70123, according as the embankment or the excavation is the larger. 104. Circular Figures. A sector of a circle (Fig. 9i) OAB is equivalent to a triangle OAC, with its vertex at the centre O...
