

Learning Disabilities and Brain Function: A Neuropsychological Approach

By William H. Gaddes, Dorothy Edgell

Springer-Verlag New York Inc., United States, 2010. Paperback. Book Condition: New. 3rd New edition. 226 x 150 mm. Language: English . Brand New Book ***** Print on Demand *****.The present edition of this book is a revision and expansion of the first two editions which appeared in 1980 and 1985, and in German translation in 1991. More than half of the present volume includes new material, and what has been retained from the former editions has been largely rewritten and updated with new research findings. A completely new chapter has been added on Attention Deficit Disorder. The author of the earlier editions (W.H.G.) has been joined by a coauthor (D.E.), and their combined elementary, high school, and university teaching and clinical experience totals approximately seventy-five years. Both of us have directed our professional energies to understanding the puzzle of human learning, especially academic learning, of those students who, despite apparently normal intelligence and opportunity, have varying degrees of difficulty in acquiring ideas and skills that are easily mastered by others. Until about fifty years ago there was a common tendency to equate academic success with intelligence, and those students who could not meet the demands of the prescribed...
